

NEEDS OF OUR SCHOOLS

- to promote development and modernisation of the organisation by improving the quality of elearning, by finding new methods and approaches and introducing good practices of other types of schools in Europe;
- to develop students digital competences based on active and experiential learning, ensuring highquality education;
- to enhance teachers digital competences in the way it aligns teacher development and performance better with school needs.

OBJECTIVES OF THE PROJECT

1. Developing digital competences of students and teachers focusing on the useful use of ICT for teaching and learning.
2. Sharing experience on creating interactive and motivating study materials and lesson plans, and using e-learning platforms and tools for creating e-content.
3. Preparing students for better exploitation of ICT potential and useful learning.
4. Preparing teachers for effective and motivating use of ICT in the classroom and e-learning platforms.
5. Assisting educational institutions to implement innovative practices related to e-learning platform supporting the needs of all learners.

OUTCOMES

- High level digital competences of teachers and students necessary for their studies and career.
- Improved e-learning system and learning platforms at schools.
- Knowledge and experience gained in the field of e-learning.
- Increased competence in foreign languages.

YEAR 1 ACTIVITIES

- contest: project logo
- evaluating the level of digital competences of teachers and students and to make suggestions and recommendations how to improve the relevant skills
- 2 joint staff trainings in Romania and Latvia
- using ICT skills and digital competences acquired , sharing experience in each school
- research on most effective tools, websites, interactive materials used at each partnerschool;
- description of Top 10 tools and recommendation on their effective use in the classroom and using e-learning
- preparing lesson plans
- games and competitions - using interactive methods and tools
- creating eTwinning twinspace for information exchange, for communication, publishing the results of the project during the project and in the implementation and follow-up stage
- articles for newspapers or internet media, newsletters/leaflets for parents and other schools to disseminate the results of the project.
